

KSB AJAX...

...takes the **risk out** of choosing
the **right fire pump package**

Simplify your fire protection system with KSB Ajax proven field experience. We can design a custom built package which is as unique and individual as your system demands.

With over 100 years of fire pump manufacturing experience, KSB Ajax Fire Pumps are installed around the world from Antarctica to Vietnam. As part of the global KSB group, our sales offices and service partners are always close by.

With a complete range of pumps, accessories and auxiliary equipment, our fire pump engineering team can design a package that meets the requirements for most commercial, industrial, oil & gas, power or mining projects.

Containerised Turnkey Fire Pumps, with fast turn-around times delivered direct to site.
