Grundfos UPS(N) pumps are the ideal choice for a wide range of domestic and commercial applications. The UPS(N) pumps are 3-speed wet rotor circulators and come in a wide range of materials and sizes. They feature an integrated pump and motor design ensuring greater ease of installation and durability. Maintenance free and whisper-quiet, these pumps are ideal for a variety of domestic and commercial heating and cooling systems.

Features

Energy efficient
A speed switch on the motor allows the pump to be adjusted to the needs of the application, improving pump efficiency and reducing energy consumption.

Robust design
The pump is made of materials that ensure excellent corrosion resistance. Designed for open systems UPS(N) is constructed from quality stainless steel with a high grade composite impeller. The UPS is constructed from rugged cast iron and is the perfect choice for closed systems.

Quiet operation
Canned motor provides an operating noise level at less than 43 decibels, the UPS is extremely quiet.

Easy installation
The UPS is a compact, inline circulator pump, making it suitable for most installations.

Applications

- Circulating hot or cold water in open or closed systems.

Technical Data

- **Mains voltage**: 1 x 240 V, 50 Hz
- **Enclosure class**: IP44
- **Insulation class**: F
- **Sound pressure level**: 43 dB
- **Approvals and markings**: UPS(N) AS4020
